0intensity_objects (ImageJ macro)

Macro for multiple objects measurements.

INPUT:
Structure of the data to be analysed:
• Serie of Images.

OUTPUT:
• "Results" window for each object: file name, area, mean value, Integrated density, and all the values for the measured lengths.
• "Summary" window : file name, number of objects, Total aea, Average size of each object, % area, Mean intensity, Integrated density.

Results are saved in "analyse.txt"

Step 1: Choose an image

Step 3: Three choices:
- **OK**
- **No, save the results**
- **Cancel**

Macro is aborted
(values are still in Results window)

**Analyse particles,
Objects are shown on top of image,
Results are saved**

Step 2: Adjust threshold
